EXPERTS FOR THE REAL WORLD
SINCE 1842

EXPERTS FOR THE REAL WORLD SINCE 1842

- 1842 Case is founded.
- **1869** The first Case portable steam engine road construction is born!
- 1958 The first Case 4-WD wheel loader, the W9, is introduced.
- 1969 Case begins skid steer loader production.
- 1985 Case starts production of its first compactor, branded Case-Vibromax.
- 1993 Case signs supply agreement with Ammann/STA for the distribution of Case branded compactors in the USA.

HERITAGE

A TRADITION OF INDUSTRY FIRSTS

- 1998 Case starts joint venture with L&T to produce and distribute 3 models of Compactors in India based on the VIBROMAX technology.
- **2000** Case signs a distribution agreement with Stavostroj, the largest manufacturer of compacting technology in Central and Eastern Europe.
- **2011** Case acquires 50% of its Indian Joint Venture with L&T and the company is renamed Case New Holland Construction Equipment India.
- **2013** Case launches the upgraded DX-Series soil compactor.
- **2016** Renewed EX-Series soil compactor features a new FPT engine.

HIGH EFFICIENCY

Tier 3 engine

The 1107 EX compactor features the new powerful 4-cylinder water cooled Tier 3 engine that delivers up to 110 hp and 16% more torque compared with the previous model.

With more than 3 million units operating all over the world, including the Case 570T backhoe loader, the engine assures an excellent reliability.

The turbocharged engine is equipped with an air aftercooler system with internal EGR that increases the density of the intake air, improving efficiency and reducing fuel consumption.

Coupled with the turbo pre-cleaner, the water cooled engine ensures excellent cooling and high fuel efficiency: -5% compared with the previous model.

FPT S8000: proven technology!

HIGH RELIABILITY

For a durable performance

- 1. Well-proven compaction technology: high manufacturing quality standards achieved throughout a long experience
- 2. 4-pins central joints: a heavy duty design solution to make the machine suitable for the most severe applications
- 3. Turbo pre-cleaner mounted on top of engine compartment: only fresh air is delivered to the engine to assure a perfect combustion
- 4. Shock absorbers: low vibrations transmitted by the drum to machine components to increase durability

Turbo Pre-Cleaner

DRUM DRIVE AND VIBRATORY SYSTEM

FIRST-RATE PRODUCTIVITY

Drum drive

The 1107 EX vibratory soil compactor is available in three configurations to meet every surface compaction need:

- The 1107 EX with single drive and smooth drum for multi-purpose activities and standard jobs
- The 1107 EX-D with drum drive and increased traction on slopes and landfills
- The 1107 EX-PD with drum drive and clamp-on pad foot for compacting more cohesive materials such as clay and silt

The optional drum drive system features an additional high torque drive motor mounted on the front drum frame, resulting in excellent gradeability (36%) and optimized traction.

HIGH VERSATILITY

Ready for every mission

2 vibration stages provided by a variable displacement bidirectional axial piston pump with electrical displacement control allow effective compaction of a wide range of soil types.

- Great manoeuvrability:
 - +/- 15° drum oscillating angle
 - 37° steering angle -> short steering radius
- Low steering effort contributes to reducing operator fatigue
- Perfect match of frequency and amplitude vibration to the soil, in order to get the best performance
- Easy transport features thanks to the optimal dimensions

MAIN REASONS

TO CHOOSE THE 1107EX

FIRST-RATE PRODUCTIVITY

- Perfect match of frequency and amplitude in vibration
- Cross-bar as a load-bearing structure for greater strength and more weight at the front
- The 32 mm thick drum shell provides excellent resistance and uniformity in compaction operations
- The ample steering angles (37° left and right) enable a reduced turning radius (3650 mm) providing excellent machine maneuverability.

COMFORTABLE OPERATOR STATION

- Efficient A/C and heating system with 8 louvers
- 90° clockwise rotating seat
- Deluxe Grammer suspension seat with adjustable armrests (ROPS and cab versions)
- Radio predisposition available (cab version)

HIGH RELIABILITY

- Standard turbo pre-cleaner
- Heavy-duty drum support frame
- World-class components

The centrifugal force is generated by an internal eccentric shaft and a rotating mass: depending on the direction of rotation, the rotating mass is in phase with the eccentric shaft for a maximum centrifugal force or in the opposite position, for a minimum centrifugal force.

COMFORTABLE AND SAFE OPERATOR STATION

Easy access and excellent visibility

- 90° clockwise rotating seat to ensure good visibility of rear wheel and front drum in every pass
- Easy and safe cab access thanks to the wide steps and robust handles
- Unobstructed glazed area from roof to top allows good visibility around the jobsite and to the drum
- Fully adjustable mechanical suspension Grammer seat for increased Operator comfort
- Efficient A/C and heating system with 8 louvers for perfect cab climate control
- Operator station mounted on rubber shock absorbers to minimize transmitted vibrations
- 2 front lights + 2 head-lamps and 2 rear work-lamps as standard 2 optional side working lights

SAFE AND EASY MAINTENANCE

Reduced downtime and operating costs

- Easy acces from ground level to battery and all main service items, thanks to the one piece engine hood
- Optimized engine layout facilitates the access to the hydrostatic and hydraulics pumps

1107EX OPERATOR STATION AND MAINTENANCE

SPECIFICATIONS

FNGINE

ENGINE	
Make	FPT
Model	S 8000 - TIER III
Type4	stroke turbocharged aftercooled
	4
Bore/stroke	104 x 115
Displacement (I)	3.9
Fuel injection	Direct
Fuel	High speed diesel
Fuel filter	Spin-on type
Air intake	Turbocharged with internal EGR
Air filter	
Engine oil filter	Spin-on type
Cooling	Liquid
Engine speeds (no load)	•
- Low:	950±50
- High:	2150±25
Max. power (hp) (Canopy / Cab)	100 / 110
(@rpm) (Canopy / Cab)	2200 / 2300
(IS03046)	
Max. torque (Nm) (Canopy / Cab)	445 / 430
(@rpm) (Canopy / Cab)	1300 / 1400
VIBRATION SYSTEM	
Type Variable displac	
	h electrical displacement control
Drive to vibration pump	Mechanical
Engine to pump ratio	Direct Drive 1:1
Displacement (cc/rev)Charge pressure (bar)	34.4
Charge pressure (bar)	27
Vibration motorFixed	displacement mounted on drum
STEERING	
Ctacking avatage	auticulated budgestatic atomics
Steering system	_articulated hydrostatic steering
Steering angle	
Turning radius (inner radius) (m)	(74° between stop to stop)
Turning radius (inner radius) (m)	3.05
Drum oscillation angle	15°
Tyre size	8 PR or 12 PR Tubeless
	8 PR OF 12 PR Tubeless
ELECTRICAL SYSTEM	
Alternator output (A) (Conony / Coh)	GE / 10E
Alternator output (A) (Canopy / Cab)	
Battery (V/Ah)	12 / 130
SERVICE CAPACITIES	
Fuel tank (I)	
1 doi tulii (I)	225
Hydraulic tank (I)	235
Hydraulic tank (I)	70
Hydraulic tank (I) Engine crank case (I) Engine coolant (I)	70 9.1

PROPULSION

Type	Infinitely variable hydrostatic drive with variable displacement pump
Drive pump Engine to pump ratio	Mechanical
Flow @rated engine (LPM)	
Drive motors	
	High speed low torque driving motor mounted on rear axle input shaft Low speed high toque drive motor mounted on front drum frame
Hydraulic oil filter	along with rear axle motorCartridge
AxleParking brake	Heavy duty with integrated parking brake mechanism and out board planetary Spring applied hydraulically released Operate on /off parking brake switch on instrument panel, engine stop
Travel speed (km/h)	0-5.5 0-11.5 Hight torque out board planetary
With drum drive (%)	31 (17°) 36 (20°) 40

INSTRUMENTATION

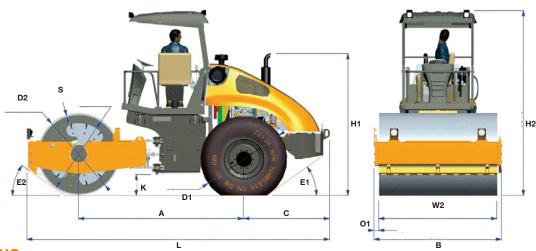

Indicators	Parking brake, high beam, low beam,
	position, battery not charging, 2-speed,
	pre-heater, turn signal left & right, neutral
Gauges	Digital hour meter, water temp,
	fuel level, engine rpm
Warning lights/alarms	Coolant overheat, hydraulic oil filter clog,
	low lube oil pressure, air filter clog

STANDARD EQUIPMENT

Sun roof, horn, front and rear working lights, 90° rotating operator seat, guard rail structure on operator's platform, tilting engine hood, vandal guard, IP67 weather proof rocker switches, instrument cluster, glove box for operator, easy split design of canopy legs for transportation, 32 mm drum shell thickness.

SPECIFICATIONS

GENERAL DIMENSIONS

DIMENSIONS

Α	Wheel base	mm	3003	
В	Overall width of the machine	mm	2324	
С	Rear overhang	mm	1562	
D1	Diameter of the rear tyres	mm	1380	
D2	Diameter of the drum	mm	1500	
H1	Height of silencer from ground level	mm	2561
